Himanshu Bhardwaj
+91-7668214746 | bhardwajhimanshu7686@gmail.com | linkedin.com/in/himanshu-bhardwaj7668|

SKILLS:

Python, R, SQL, Excel, Statistics, Prompt Engineering, Machine Learning, Deep Learning (ANN, CNN), NLP, Time Series ,Web scraping (BeautifulSoup, Requests), Big Data (Hadoop) ,HTML, CSS, Github

EDUCATION:

B.C.A in Data Science (Parishkar College of global excellence) (8 CGPA) **2023-26**

PROJECTS:

NLP (Language analysis (End-To-End))

- **Task:** Developed an NLP-based system to detect and classify text languages.
- **Action:** Built a Multinomial Naive Bayes model and integrated it with FastAPI using HTML/CSS frontend.
- **Result:** Achieved 98% training accuracy and 95% testing accuracy with real-time predictions.

Netflix Dataset (April 2013 – January 2014)

- **Task:** Analyzed Netflix dataset to identify content trends and distribution patterns.
- **Action:** Performed data analysis and applied NLP using Multinomial Naive Bayes (73% accuracy).
- **Result:**Identified key insights like 70% movies, peak uploads in 2018, and 31% content from the US.

Fraud Detection:

- **Task:** Developed a credit card fraud detection system for imbalanced data.
- **Action:** Applied Logistic Regression with a 0.2 threshold to improve recall.
- **Result:** Achieved 94% recall, detecting most fraud cases with acceptable false positives.

Disease Prediction (End-To-End):

- **Task:** Develop an end-to-end machine learning system to predict diseases based on user symptoms.
- **Action:** Collected and preprocessed medical dataset, performed feature selection, trained multiple ML models (e.g., XGBoost / Random Forest), and built a user-friendly interface using Python.
- **Result:** Achieved accurate disease predictions with(76% of accuracy) and created a system that can assist users in early diagnosis and awareness.

INTERNSHIPS:

Data Science at Creatik AI (Jan 2026 – March 2026):

- **Task:** Performed data analysis to identify trends and extract meaningful business insights.
- **Action:** Conducted EDA and applied time series analysis to explore patterns and data behavior.
- **Result:** Delivered actionable insights that improved understanding of trends and supported data-driven decision making.

CERTIFICATIONS:

Creatik AI : Data Analystics
MainCrafts Technology : Data Science and Data Analystics
Coursera : Data Anaysis in Python
Simplilearn : Introduction to SQL
Infosys : Python for Data Science
HackerRank : Basic(Python)
Deloitte : Data Analyst
Quantium : Data Analyst
